

Goddard Space Flight Center: High Technology in the Neighborhood Since 1959

Just 10 miles from Laurel, the National Aeronautics and Space Administration (NASA) operates its largest center, Goddard Space Flight Center (GSFC).

With over \$1.5 billion spent annually and 2700 employees living in PG county alone, GSFC has a huge impact on the Laurel area.

This presentation will give an overview of GSFC, discuss some of the center's history, and highlight a mission now in development which will bring back a sample from a near-Earth asteroid.

Join Dave Everett, Project Systems Engineer for what looks to be an exciting evening program!

March 12, 2015
Laurel Municipal Pool Room
7pm
